

MICHAEL R. PENCE, Governor  
STATE OF INDIANA

INDIANA DEPARTMENT OF HOMELAND SECURITY  
302 West Washington Street  
Indianapolis, IN 46204

## Executive Summary

Effective 9-5-2013 (10:07 AM)

### Standards Editions Adopted by the State of Indiana under Title 680 of the Indiana Administrative Code

- This Executive Summary is intended to clarify the standards editions in effect under Title 680 of the Indiana Administrative Code (Boiler and Pressure Vessel Rules) at the time that this document is being written, and as noted herein (September 5<sup>th</sup>, 2013 @ 10:07 AM).
- Statutorily, the Indiana Boiler and Pressure Vessel Rules Board have been granted the authority to adopt Emergency Rules. This authority is granted solely for the purpose of updating the editions of standards adopted by the Rules Board and referenced within 680 IAC 2-1-1 in a timely manner.
- There is currently one emergency rule in effect. That Emergency Rule is LSA Document 13-418(E), and became effective September 5<sup>th</sup>, 2013 at 10:07 AM.

Emergency Rule 13-418(E) supersedes (but does not replace) the text located at;

- ❖ 680 IAC 2-1-1 (a) (1) establishing the mandatory edition dates of all ASME standards referenced therein as the 2010 Edition, with the 2011 Addenda.
  - ❖ 680 IAC 2-1-1 (a) (3) establishing the mandatory edition date of the National Board Inspection Code referenced therein as the 2011 Edition.
  - ❖ 680 IAC 2-1-1 (a) (4) establishing the mandatory edition date of the American Petroleum Institute 510 (API 510) Pressure Vessel Inspection Code, as the Ninth Edition, June 2006.
- Emergency Rule 13-418(E) also replaces in their entirety two previous Emergency Rules that established these same mandatory editions dates, but that were soon to expire. These previous Emergency Rules were;
    1. LSA Document # 11-585(E) This document became effective October 12<sup>th</sup>, 2011 at 11:18 AM. LSA Document # 11-585(E) supersedes the text located at 680 IAC 2-1-1 (a) (1) and establishes the mandatory edition dates of all ASME standards referenced therein as the 2010 Edition, with the 2011 Addenda.
    2. LSA Document # 12-521(E) This document became effective September 6<sup>th</sup>, 2012 at 12:49 PM. LSA Document # 12-521(E) supersedes the text located at 680 IAC 2-1-1 (a) (3) and establishes the mandatory edition date of the National Board Inspection Code referenced therein as the 2011 Edition.

- Emergency Rule LSA Document # 13-418(E) must be read concurrently with the remaining paragraphs of 680 IAC.

As stated previously herein, the emergency rule text *supersedes* the editions referenced within the body of 680 IAC 2-1-1, but *does not replace it*. This fact often causes confusion because even though the text of the Emergency Rule(s) renders the text contained within 680 IAC 2-1-1 itself irrelevant, it is still there to be read.

- A link to Emergency Rule LSA Document # 13-418(E) can be found on the primary BPVSS web page at the following URL; <http://www.in.gov/dhs/2378.htm>
- Questions or enquiries may be directed to the author as care of;
